Cantwell Electrical Engineering Limited is an established market leader with 43 years experience, knowledge and expertise in Pumping and Treatment Systems. A global ISO certified business that specialises in providing top quality water solutions to a broad range of sectors, from the local Irish domestic market, to the large commercial and municipal industries nationwide and around the world.

We are inviting applications for the following position:

Maintenance Electrician / Instrument Technician

We require Maintenance Electricians / Instrument Technicians to join our National Service Team.

Applicants must have experience in fault finding of control panels, automation, and control equipment.

Experience of instrumentation equipment maintenance, service, repair, and calibration within the water and wastewater industry would be an advantage.

Closing Date for applications, April 29th 2022
